

Continuity of Care Financial Policy

At Ciarrocca Chiropractic Center it is our goal to get you the highest quality care in the most timely fashion possible. It is the goal of Dr. Ciarrocca to relieve your pain and then heal the source of that pain. Continuity of care is crucial in order to achieve these goals.

At this time your insurance company is requesting from Dr. Ciarrocca, a written treatment plan which they will approve or disapprove. This is a common practice among insurance companies, however it can delay with the doctor's ability to help you relieve your pain and get you back to a state of balance. Under the circumstances there are two options available:

Option 1: Continue with scheduled care with the understanding that if your insurance carrier does not approve the treatment plan, you will be responsible for the bill. Your insurance company will not be billed until we have received word of the acceptance or rejection of the treatment plan. In the vast majority of cases, the treatment plan submitted by the doctor is approved.

Option 2: Delay treatment until the treatment plan is approved by your insurance company. We will be happy to let you know as soon as the treatment plan is approved and will set up appointments for you to receive your care at that time.

_____ I would like to select Option 1 and continue my treatment in lieu of the treatment plan being approved by my insurance company

_____ I would like to select Option 2 and wait until my treatment plan to be approved by my insurance company
